Microsoft Office

Word • Excel • Powerpoint

Adobe

Illustrator • Photoshop • Premiere

Programming

HTML • CSS • PHP • Javascript

Educational Background

Our Lady of Fatima University - Antipolo Campus (2019-2022)

- Bachelor of Science in Information and Technology

iACADEMY(2011-2015)

- Bachelor of Science in Game Development

Work Experience

Internship

Wash N' Wrap (Feb 7, 2022- March 25, 2022)

For our internship and thesis, I applied my designing skills to develop the UI/UX of Wash N' Wrap's website, an auto-detailing shop, through the process of mapping out a wireframe, and designing a minimalist easy-to-use interface with straight-forward functions. Tests were run to identify working functions from bugs which accelerated the development of our system.

Concentrix (April 5, 2021 - May 7, 2021)

As part of our internship, I trained as a technical support in Concentrix where we executed mock calls based on S.T.A.R., an interview method used to foster cooperation with customers for smoother communication and resolving issues.

RFC Works (September 8, 2014- October 17, 2015)

As an intern, I worked as a graphic artist in charge of designing enemy sprites and terrains to which known deadly bacterias and muscle tissues were used as inspirations respectively.

Programs used to accomplish these were Adobe Illustrator for the designs, and Adobe Flash for the animations.
